CURRENT COMMENT.

CHICAGO'S new library building, erected at a cost of nearly \$2,000,000, is almost ready for occupancy.

A RECORD kept by a Rhode Island paper makes the annual number of homicides in this country over 10,000. The number in the United Kingdom, with half our population, is only 500.

THE Chicago beer war has at last been settled and the price will be advanced to \$3 a barrel. All the brewers but one signed the contract, as did the St. Louis companies.

AN official of the Santa Fe railroad estimates the corn crop in Kansas, Missouri, Illinois and Texas at 900,000,000 bushels, and the wheat crop in the four states at 43,800,000 bushels.

THE prospects for the international acceptance of the Washington rules to prevent collisions at sea was reported bright by Navigation Commissioner Chamberlain, who has returned from consultation with Mr. Bayard and the British authorities upon the subject.

It has been predicted that before long the sunflower will come into general cultivation in this country. As a plant it has no superior for rapid growth and prolific yield of seed, leaves and stalk, all of which could be utilized.

AN artesian well is to be sunk to a depth of 2,500 feet near Holyoke, Col., in the hope of obtaining a free flow of water. The state legislature appropriated \$5,000 for the experiment. If it should prove a failure many settlers in eastern Colorado will seek new homes.

AFTER almost five years of work and the expenditure of over \$3,000,000, Niagara falls has finally been harnessed, and the power generated by the monster 5,000 horse-power dynamos of the Cataract Construction Co. are now sending out the electricity for commercial use.

THE Cologne Gazette published a dispatch recently from its correspondent in St. Petersburg asserting that nihilism was now more active throughout Russia than at any time since the death of the Czar Alexander II. The nihilists have gradually grown bolder since the accession of the new czar to the throne.

THE oyster crop this season will be the largest that has been known in many years. Trade was dull last year, money being scarce and an unusually small demand was consequently made upon the oyster beds. This was followed by a period of prolific spawning during the months when oysters retire from commerce, and the result is an exceptional accumulation of succulent bivalves.

THE board of health in Chicago has enough faith in the anti-toxine treatment for diphtheria to map out a campaign for a general distribution of that remedy among the people. The plan is to obtain the serum at first cost from the firm in New York and place it on sale at drug stores where it will be accessible to the populace. The commissioner of the health department has statistics which show that the use of anti-toxine in Chicago has decreased the mortality from diphtheria in that city 40 per cent.

MISS ANNIE LONDONDERRY, a Boston cyclist, is making a trip around the world on her wheel. Fourteen months ago Miss Londonderry left Boston to go round the world in fifteen months. She started without a cent of money and was attired in a paper suit. She was to earn her expense money without begging, borrowing or stealing. Recently she rode into Omaha, Neb., having covered 9,400 miles of her journey and with nearly thirty days to make the remaining distance. If she arrives in time she is to get \$5,000.

THE Salvation army of Denver, Col., has organized a cavalry corps of young women and Brig.-Gen. French, of St. Louis, recently dedicated the new branch of the service at the First Baptist church in that city in the presence of a big crowd. The new corps is under the leadership of Staff Capt. Blanche Cox. They wear dark blue skirts, regulation red waists with wide rolling collar and regulation bonnets. This corps enjoys the distinction of being the only mounted Salvation army fighters in the world and will start on a tour of the mountain towns.

THE great topic of discussion in railroad circles recently was the railway races from London to Aberdeen by the east and west routes. The west coast companies took the initiative and did the distance, 540 miles, at the rate of a mile a minute throughout. These companies thus made a new world's record, while completely smashing the record held for the past three years by the Empire state express from New York to Buffalo. The east route companies then improved on this time, and finally the west coast did 540 miles in 513 minutes, or a mile in 56.4 seconds.

AN innovation in street traffic in the form of a horseless wagon was seen recently in New York. The wagon was brought from Paris, where similar ones are now in use both for pleasure and business purposes. It is an automatic vehicle and petroleum is used as a motor power. It is very easily controlled. The motor, which is of horizontal movement, is independent, and can be used for any other purpose. It is fitted with a bicycle-like arrangement of sprocket wheels and chains on either side. A crank in front guides the vehicle and three brakes keep it under control.

The whole plan had not been worked out by the commission in detail, but the idea will be perfected when on the ground.

AN EARTHQUAKE.

Three Distinct Shocks Felt by the Residents of Brooklyn.

PHILADELPHIA ALSO STIRRED UP.

Consternation Created in the Quaker City—People at Sandy Hook Thought It Was an Explosion—What the Weather Man Said.

BROOKLYN, Sept. 2.—Three distinct earthquake shocks were felt by the residents of Brooklyn about 6 o'clock yesterday morning. No damage to life or property is reported from any section of the city. The districts of East New York and South Brooklyn received the greatest shock, but the rumblings were distinctly felt in other sections of the city. Contradictory reports are given as to the severity of the shocks. The first shock, which was felt at 6 o'clock, followed a rumbling noise like distant thunder. This was followed by two other slighter shocks, which, according to most of the reports, died away in a low grating tone.

At many hotels the guests were so frightened by the vibrations that they hurried into the hallways to find out the cause of the trouble. The guests at the Pierpont house were very much alarmed and many of them went down stairs and asked the night clerk what had happened. They thought an explosion must have occurred in the hotel.

PHILADELPHIA ALSO STIRRED UP.

PHILADELPHIA, Sept. 2.—An earthquake shock lasting several seconds was felt in this city shortly after 6 o'clock yesterday morning. The disturbance by mother earth of the quiet of the Sabbath morning was violent enough while it lasted to create a good deal of consternation and not a little damage. Buildings perceptibly swayed, windows clattered and banged and clocks and pictures toppled from their places.

The shock was most severely felt in the suburban districts and it is said that in one part of George's hill, in Fairmount park, a fissure was opened permitting the entrance of a plummet, which extended down over 100 feet without touching bottom. A large plate glass window in the shade store of Michael Lett, on Germantown avenue, was split from top to bottom. Similar cases are reported from other sections of the city.

At the Zoological gardens the vibration was clearly perceptible, but the excitement which followed among the animals continued for a good while after the seismic disturbances. Head Keeper Manly asserts the trumpeting of the elephants, the roar of the lions and the screeching of the birds was simply terrific.

THOUGHT IT WAS AN EXPLOSION.

SANDY HOOK, Sept. 2.—On Saturday night a heavy thunder and rainstorm passed over Sandy Hook. Clearing off the wind shifted, coming from the north, and the temperature fell considerably. People living on Sandy Hook used an extra blanket of covering during the night. The sleepers were aroused yesterday morning by a rumbling sound. Shaking of buildings, rattling of windows and dishes followed. It was thought that a slight accident had happened to some of the explosives stored here, and it was not at first supposed that an earthquake caused the commotion. But reports of the effects of the shock at other points being received convinced all that it was an earthquake that caused all of the trouble here. The operator on duty at the time in the marine observatory felt the quake quite distinctly, the tower shaking considerably. It was between seven and eight minutes after 6 o'clock that the trouble was first observed and the duration of the shock was estimated from three to fifteen seconds.

WHAT THE WEATHER MAN SAYS.

NEW YORK, Sept. 2.—According to the Weather Forecaster Dunn the earthquake reached this city at 6:11 o'clock yesterday morning. The shock was slight and lasted ten seconds. It traveled from south to north, but comparatively few persons in the city noticed the disturbance.

The shocks were also felt at Jersey City, N. J., and at Chester, Pa., low rumbling sounds being heard and the houses trembled and pictures fell from their fastenings.

THE POPE'S TEMPORAL POWER.

Catholics Throughout the World to Hold Religious Services on September 30 for Its Restoration.

ST. LOUIS, Sept. 2.—Twenty-five years ago the 20th of September the church of Rome was shorn of its temporal power. In commemoration of the event a celebration will be held in Italy September 20 this year. To offset this celebration the Catholic church throughout the world will on the same date hold religious services in which it will offer prayers to the Almighty for the peace and final triumph of the church and for the liberty of the holy see. To this end bishops and archbishops of various dioceses have promulgated orders for special services in all the churches in the diocese, and Archbishop Kain says, in addition, that should Catholic societies and sodalities think fit to embody their sentiments of sympathy and affection for the holy father in the form of resolutions, he will forward the resolutions to the sovereign pontiff.

The total phase begins at 11:06 p. m. and ends at 12:48 a. m., September 4.
